Much of its collection was seeded by Project Gutenberg back in the mid-2000s, but has since taken on an identity of its own with the addition of thousands of self-published works that have been made available at no charge.

Ford Midget Engine

The engine that was used initially by both the midgets and boats was the so-called Ford Flathead V860 engine. Initially, the limit for these classes was only 135 cubic inches but that would grow to about 150 cubic inches, i.e., 2.5 liters. This was one of the aforementioned engines that had been completely built by Ford for street car use.
