Calculation of Doses for Children.

Young's Rule = expression used to determine a drug dosage for children.

The correct dosage is calculated by dividing the child's age by an amount equal to the child's age plus 12 and then multiplying by the usual adult dose.

Formula:  $\text{Adult Dose} * (\text{Age} \div (\text{Age} + 12)) = \text{Child's Dose}$ . Example:
