Tangent(theta) =  
(21.951 m/s) / (37.751  
m/s) = 0.58145. Theta  
= Invtan (0.58145) =  
30.2 degrees. (b) In  
part (a) of this  
problem, the initial  
horizontal velocity was  
determined to be  
37.751 m/s. For  
projectiles, this  
horizontal velocity  
does not change during  
the flight of the  
projectile.

A projectile is launched with an initial horizontal velocity from an elevated position and follows a parabolic path to the ground.

Predictable unknowns include the initial speed of the projectile, the initial height of the projectile, the time of flight, and the horizontal distance of the projectile.
