So I'm just going to write a bunch of numbers and then write them in scientific notation. And hopefully this'll cover almost every case you'll ever see and then at the end of this video, we'll actually do some computation with them to just make sure that we can do computation with scientific notation.

Scientific Notation - Turos Math Class

We will walk through countless examples, and be able to use Scientific Notation efficiently, without the use of a calculator. But, it is important to note, that if you do use a calculator or math program, sometimes you will see an "E" instead of " $\times 10$ ", but don't fear... they mean the same thing!

or m times ten raised to the power of n , where the exponent n is an integer, and the coefficient m is any real number. The integer n indicates the decade and the real number m is called the significand or mantissa. The term "mantissa" may cause confusion because it is the name of the fractional part of the common logarithm.
