### **Stuttering: Types, Symptoms, and Causes**

Stuttering modification therapy, also known as traditional stuttering therapy, was developed by Charles Van Riper between 1936 and 1958. It focuses on reducing the severity of stuttering by changing only the portions of speech in which a person stutters, to make them smoother, shorter, less tense and hard, and less penalizing.

Stuttering Modification Strategies  
(Reducing Physical Tension/Struggle)  
Identify where in the speech mechanism physical tension is and release it.  
Traditional stuttering modification strategies include preparatory set, pull-out, and cancellation and require a child to identify a moment of disfluency before, during, or after it occurs, making adjustments to reduce tension and struggle.
